- NEW New Deep Lagoon™ Design with Infinity Flush Front™

PRELIMINARY

55SV670U 54.6" diagonal 1080p HD LCD TV with FocaLight™ LED Backlighting with Local Dimming

55SV670U

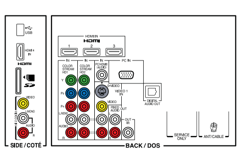

The New REGZA® Cinema Series® LED TV is the most advanced, most beautiful TV we've ever produced. Our advanced FocaLight™ LED Backlight System with Local Dimming, and stunning new Deep Lagoon™ Design with Infinity Flush Front™, create the perfect combination of high quality and stylish appeal.

New FocaLight™ LED Backlighting – If you won't settle for anything but the deepest, most stunning picture quality, FocaLight™ LED Backlight is what you've been waiting for. Lesser Edge LED Systems must sacrifice peak white brightness to attain better blacks. However, our new FocaLight™ system utilizes a Full LED Matrix with superior Local Dimming that enables it to create Deep Blacks and Bright Whites simultaneously. Thanks to FocaLight™, our New REGZA® LCD TV attains an all-new level of picture quality with an amazing 2,000,000:1 Dynamic Contrast. Once you experience the New REGZA® with FocaLight™, it will be hard to watch anything else.

New Deep Lagoon™ Design with Infinity Flush Front™ – Inspired by nature and reminiscent of sand disappearing below the surface of calm shores, the Deep Lagoon™ design adds a unique feeling of character and style to flat panel TV. Also inspired by water and taking LCD TV design to the next level, the new Infinity Flush Front™ provides a seamless front face that is similar to the surface of an infinity pool. The combination of Deep Lagoon™ and the Infinity Flush Front™ creates a stunning, elegant design for a level of stylish appeal that you must see, and will not forget.

New ClearScan 240™ – If you love watching Sports or Action Movies, ClearScan 240™ will put a smile on your face. Some flat panel TVs just can't keep up with the action. On the other hand, REGZA® LCD TV with ClearScan 240™ will make you feel like part of the action. ClearScan 240™ combines 120 frames per second with a new advanced Backlight Scanning System to create a 240 Hz Effect. New REGZA® LCD TV with ClearScan 240™ creates such a new level of picture clarity with motion video that you won't know whether to stay glued to your seat, or to jump from it.

New Dolby® Volume – If you have ever been bothered by loud TV commercials or inconsistent volume when changing channels, you need our new Dolby® Volume technology. Advanced algorithms monitor the audio during programs, when commercials start, and when changing channels. Louder programming is brought down, while lower programming is brought up. This ensures a consistent volume level with full dynamic range at all times.

[1]Effect of Resolution+™ enhancements may vary depending upon the input signal and content quality.
[2]Use of REGZA-LINK® which is a feature based on HDMI™-CEC requires an HDMI™-CEC compatible display device. Depending on the specifications of your display device, some or all REGZA-LINK® functions may not work even if your display device is HDMI™-CEC compatible.
[3]Viewing 24 frames per second requires content created in 480p / 24 frames/second.
[4]In some cases, the universal remote may not operate additional devices or certain features of such devices, in which case, it is suggested that you use the original remote control for the applicable device.
[5]If you decide to wall mount your Toshiba television, always use a UL Listed wall bracket appropriate for the size and weight of the television.
